Mugisha Julien | 26967 | [LinkedIn Profile](#)

My name is Mugisha Julien, and I am currently a 4th-semester student in the Information Technology department, specializing in Software Engineering. I am originally from Gisenyi but currently reside in Gishushu, Gasabo District.

In my day-to-day life, I make extensive use of digital tools, particularly in my freelancing work. I focus on professional photo and file editing, logo design, and MySQL database design, which allows me to engage in a variety of creative and technical projects.

Through this course, I aim to enhance my skills in Oracle database management and deepen my understanding of related technologies. I believe this will significantly contribute to my academic and professional development.

One thing that you may not know about me is that I'm an athlete. I enjoy playing football and swimming, which helps me maintain a healthy balance between my studies and personal interests.
